

Freezeer project assessment framework

Team Member: Dennis Ideler
Evaluator: Andrew Ross
Date: December 18th, 2011

This template will be used as a framework/guide for assessing the success of Freezeer projects. We will adjust the weights and deliverables as needed for each project as part of the wk 3 deliverable. Late deliverables will be assessed a 20% deduction per day late. Partial completion will be assumed roughly 50% unless there are mitigating circumstances detailed in the design document and approved.

Item	Deadline	Weight	Status
Initial blog posted to http://fossic.org	wk 1	2.5%	Yes
Proposal draft announced to mailing list (ideally attached to blog)	wk 1	2.5%	Yes
Responded to feedback from mailing list	N/A	2.5%	Yes
Kept in touch via. IM or IRC	weekly	10%	Yes, constantly in contact
Interacted with peers in the community (via. IRC/emails/proposals/bug reports)	N/A	7.5%	Yes, wonderful job
Arranged phone calls/meetings as needed	N/A	2.5%	Yes
Code submitted to github during project	N/A	5%	Yes
1 st status update posted, design document updated, schedule confirmed	wk 3	5%	Yes
2 nd status update posted, design document updated	wk 6	5%	Yes
Draft code submitted to github & announced	wk 9	10%	Yes
Draft code submitted to reviewboard for review	wk 9	10%	Yes
Fixed issues from review	wk 10	10%	Yes
Code merges cleanly with development	wk 11	10%	Yes
All outstanding bugs/known issues captured in bug reports & in design document	wk 11	7.5%	Yes
Wrap-up blog post, screencast	wk 12	5%	Yes

Assessment result: A+

Comments: Dennis' work was very impressive in terms of the breadth, depth, and quality. He overhauled and re-organized project Freezeer's documentation from top to bottom and added many new areas such as a Wikipedia page, a Github pages web page, and much more. As a sign of the volume of his work accomplished, it took nearly 30 minutes simply to walk through a list of the various items. What is exceptionally impressive is the deep thought, passion, and care he put into his work. Everything he did was well rationalized and thought out. To do achieve this level of excellence in improving the documentation, it required Dennis to learn and understand a lot of technology. Frankly I doubt myself or Thanh as project leaders could have done much better. We very much appreciated working with Dennis. Thank you Dennis!
